No. NABH/Meetings/QC/2020/

Dated: 06/05/ 2020

Minutes of Meeting

A meeting with NIC and Hospital IT team/server Room was held on 04/03/2020 at 2:30 PM to discuss departmental preparedness for NABH Pre-entry level certification in MS Office-Committee room, (V Floor).

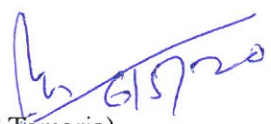

At the outset, all the participants were welcomed by Medical superintendent and initiated discussions.

1. O I/C, NABH proposed to create a web page on VMMC & SJH website to post all documents, updates, common formats and activities related to NABH. It was agreed by MS and IT team.
2. O I/C, NABH raised issue of admission face sheet and UHID generated for OPD, Emergency and IPD. Admission of patient through NIC portal results in generation of face sheet depicting unique ID and patient's demographic details which printed on A4 paper and attached with a blank Hospital admission discharge printed face sheet. Therefore, to maintain uniformity and completeness of the patient's record there is need to merge these 2 sheets and make it bilingual. The NIC representative showed its inability as it is universal format across various hospitals of the country. However they suggested that the details generated through NIC admission portal can be printed on sticker and pasted on Hospital admission sheet which is bilingual to meet the NABH requirements. The font size can be customised for this purpose. After deliberations, It was decided that as pilot project a sticker may be used as being practiced at NEB. A printer and Stickers may be made available as being done in NEB.
3. The different admission portal used in the hospital and generation of different unique IDs with no inter relation between these IDs. Therefore, a patient admitted in SJH NEB and later in SJH ward can have 2 different IDs. As per

NABH standards one patient should have one single unique ID. After deliberation it was realised that a common single portal is required to fulfil this requirement. The IT team briefed participants that the hospital has contract with other private agencies that is still valid so they cannot move to one single portal. MS suggested that since NIC is GOI agency and providing open source e-Hospital so this shall be utilised for single portal for the admission and subsequently for HMIS. Matter has already been discussed in the Ministry. A proposal is being prepared for the Ministry with suggested solutions, however, decision on this matter would depend on the directions of the competent authority.

4. The pending issues of MRD were also discussed and NIC representative assured to sort out all matters on priority to the satisfaction to hospital authorities.

This issues with approval of MS.

(Dr. K C Tamarina)
Officer I/C, Quality Cell
