Premarital & Preconception Counselling Clinic

Monday 2-4 pm

Room No: 168, 1st floor, OPD Block

Premarital Counseling helps in ensuring that you and your would be partner have a strong, healthy relationship so as to give you a better chance for a stable and satisfying marriage. It is also considered as the primary preventive approach for couples planning for conception; it can identify and modify behavioral, medical and other health risks factors known to impact pregnancy outcomes through prevention and management. It will offer a range of tests to would be couples for screening of health problems like genetic, infections and blood disorders, which they might transmit to their children.

**Premarital and Preconception counseling are considered a step towards saving the society and allowing people to enjoy life.**
